# Safe Harbor Statements

All statements in this presentation that address events, developments or results that we expect or anticipate may occur in the future are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the U.S. Private Securities Litigation Reform Act of 1995. In most cases, forward-looking statements may be identified by words such as “anticipate,” “may,” “will,” “could,” “should,” “would,” “expect,” “intend,” “plan,” “goal,” “contemplate,” “believe,” “estimate,” “predict,” “project,” “potential,” “continue,” “seek,” “strategy,” “future,” “likely” or the negative or other variations on these words and other similar expressions. These statements, which may include, without limitation, projections regarding our future performance and financial condition, are made on the basis of management’s current views and assumptions with respect to future events. These statements speak only as of the date they were made, and we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. We operate in a changing environment where new risks emerge from time to time and it is not possible for us to predict all risks that may affect us. The forward-looking statements are not guarantees of future performance, and the forward-looking statements, as well as our prospects as a whole, are subject to risks and uncertainties that could cause actual results to differ materially from those set forth in the forward-looking statements. These risks and uncertainties include, without limitation:

- the health of the U.S. housing market generally and changes in economic conditions that impact the size of the insurable mortgage market, the credit performance of our insured mortgage portfolio and our business prospects, including more recently, changes resulting from inflationary pressures, the rising interest rate environment and the risk of a recession and higher unemployment rates, as well as other macroeconomic stresses such as those that may arise from the Russia-Ukraine conflict or other geopolitical events or as a result of the COVID-19 pandemic;
- changes in the way customers, investors, ratings agencies, regulators or legislators perceive our performance, financial strength and future prospects;
- Radian Guaranty Inc.’s (“Radian Guaranty”) ability to remain eligible under the Private Mortgage Insurer Eligibility Requirements (the “PMIERS”) and other applicable requirements imposed by the Federal Housing Finance Agency and by Fannie Mae and Freddie Mac (collectively, the “GSEs”) to insure loans purchased by the GSEs;
- our ability to maintain an adequate level of capital in our insurance subsidiaries to satisfy current and future regulatory requirements;
- changes in the charters or business practices of, or rules or regulations imposed by or applicable to, the GSEs or loans purchased by the GSEs, which may include changes in furtherance of housing policy objectives such as the accessibility and affordability of homeownership for low-and moderate-income borrowers and underrepresented communities, or changes in the requirements for Radian Guaranty to remain an approved insurer to the GSEs, such as changes in the PMIERS or the GSEs’ interpretation and application of the PMIERS or other applicable requirements;
- the effects of the Enterprise Capital Framework, which establishes a new regulatory capital framework for the GSEs, and which, as finalized, increases the capital requirements for the GSEs, and among other things, could impact the GSEs’ operations and pricing as well as the size of the insurable mortgage market, and which may form the basis for future changes to the PMIERS;
- changes in the current housing finance system in the United States, including the roles of the Federal Housing Administration (the “FHA”), the GSEs and private mortgage insurers in this system;
- our ability to successfully execute and implement our capital plans, including our risk distribution strategy through the capital markets and traditional reinsurance markets, and to maintain sufficient holding company liquidity to meet our liquidity needs;
- our ability to successfully execute and implement our business plans and strategies, including plans and strategies that may require GSE and/or regulatory approvals and licenses, that are subject to complex compliance requirements that we may be unable to satisfy, or that may expose us to new risks, including those that could impact our capital and liquidity positions;
- uncertainty from the discontinuance of LIBOR and transition to one or more alternative benchmarks that could cause interest rate volatility and, among other things, impact our investment portfolio, cost of debt and cost of reinsurance through mortgage insurance-linked notes transactions;
- risks related to the quality of third-party mortgage underwriting and mortgage servicing;
- a decrease in the “Persistency Rates” (the percentage of insurance in force that remains in force over a period of time) of our mortgage insurance on monthly premium products;
- competition in the private mortgage insurance industry generally, and more specifically: price competition in our mortgage insurance business, including the prevalence of formulaic, granular risk-based pricing methodologies that are less transparent than historical rate-card-based pricing practices; and competition from the FHA and the U.S. Department of Veterans Affairs as well as from other forms of credit enhancement, such as GSE-sponsored alternatives to traditional mortgage insurance;
- U.S. political conditions and legislative and regulatory activity (or inactivity), including the adoption of (or failure to adopt) new laws and regulations, or changes in existing laws and regulations, or the way they are interpreted or applied;
- legal and regulatory claims, assertions, actions, reviews, audits, inquiries and investigations that could result in adverse judgments, settlements, fines, injunctions, restitutions or other relief that could require significant expenditures, new or increased reserves or have other effects on our business;
- the amount and timing of potential payments or adjustments associated with federal or other tax examinations;
- the possibility that we may fail to estimate accurately, especially in the event of an extended economic downturn or a period of extreme market volatility and economic uncertainty, the likelihood, magnitude and timing of losses in establishing loss reserves for our mortgage insurance business or to accurately calculate and/or project our Available Assets and Minimum Required Assets under the PMIERS, which will be impacted by, among other things, the size and mix of our insurance in force, the level of defaults in our portfolio, the reported status of defaults in our portfolio, (including whether they are subject to mortgage forbearance, a repayment plan or a loan modification trial period), the level of cash flow generated by our insurance operations and our risk distribution strategies;
- volatility in our financial results caused by changes in the fair value of our assets and liabilities, including with respect to our use of derivatives and within our investment portfolio;
- changes in “GAAP” (accounting principles generally accepted in the U.S.) or “SAPP” (statutory accounting principles and practices including those required or permitted, if applicable, by the insurance departments of the respective states of domicile of our insurance subsidiaries) rules and guidance, or their interpretation;
- risks associated with investments to grow our existing businesses, or to pursue new lines of business or new products and services, including our ability and related costs to develop, launch and implement new and innovative technologies and digital products and services, whether these products and services will receive broad customer acceptance or will disrupt existing customer relations, and additional financial risks related to these investments, including required changes in our investment, financing and hedging strategies, risks associated with our increased use of financial leverage, which could expose us to liquidity risks resulting from changes in the fair values of assets, and the risk that we may fail to achieve forecasted results which could result in lower or negative earnings contribution and/or impairment charges associated with intangible assets;
- the effectiveness and security of our information technology systems and digital products and services, including the risk that these systems, products or services fail to operate as expected or planned or expose us to cybersecurity or third-party risks, including due to malware, unauthorized access, cyber-attack, ransomware or other similar events;
- our ability to attract and retain key employees; and
- legal and other limitations on amounts we may receive from our subsidiaries, including dividends or ordinary course distributions under our internal tax- and expense-sharing arrangements.

**For more information regarding these risks and uncertainties as well as certain additional risks that we face, you should refer to “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2021, and to subsequent reports and registration statements filed from time to time with the U.S. Securities and Exchange Commission. We caution you not to place undue reliance on these forward-looking statements, which are current only as of the date on which we issued this presentation. We do not intend to, and we disclaim any duty or obligation to, update or revise any forward-looking statements to reflect new information or future events or for any other reason.**

# About Us

**PMIERS Excess Available Assets <sup>(1)</sup>**

Compared to \$1.4 billion as of June 30, 2022 and \$1.7 billion as of September 30, 2021

1) Represents Radian Guaranty's excess or "cushion" of Available Assets over its Minimum Required Assets (MRA), calculated in accordance with the PMIERS financial requirements in effect for each date shown.

# GAAP Diluted Net Income Per Share <sup>(1)</sup>

## Q2 2022 to Q3 2022

- 1) All diluted net income (loss) per share items are calculated based on 175.4 million weighted-average diluted shares outstanding for the quarter ended June 30, 2022, except for the September 30, 2022 diluted net income (loss) per share, which was calculated based on 164.7 million weighted-average diluted shares outstanding for the quarter ended September 30, 2022.
- 2) The impact from the decrease in adjusted diluted average common shares outstanding represents the difference between (i) diluted net income as of September 30, 2022 divided by the weighted-average shares outstanding for the three months ended September 30, 2022; and (ii) diluted net income as of September 30, 2022 divided by the weighted-average shares outstanding for the three months ended June 30, 2022.

# GAAP Book Value Per Share <sup>(1)</sup>

June 30, 2022 to September 30, 2022

- 1) All book value per share items are calculated based on 166.4 million shares outstanding as of June 30, 2022, except for the September 30, 2022 book value per share, which was calculated based on 157.1 million shares outstanding as of September 30, 2022.
- 2) Reflects the impact of our share repurchases for the three months ended September 30, 2022, inclusive of the cost of these repurchases.

# Accumulated Other Comprehensive Income (Loss) (AOCI) Impact to Book Value Per Share

## GAAP Book Value Per Share

## Contractual Maturities of Fixed-Maturities Available for Sale

As of September 30, 2022

<i>\$ in millions</i>	Amortized Cost	Fair Value	Unrealized gain (loss) recorded in AOCI
<b>Due in one year or less</b>	\$106	\$104	\$(2)
<b>Due after one year through five years</b> <sup>(2)</sup>	\$1,264	\$1,179	\$(85)
<b>Due after five years through 10 years</b> <sup>(2)</sup>	\$1,004	\$848	\$(156)
<b>Due after 10 years</b> <sup>(2)</sup>	\$839	\$632	\$(207)

<b>Total</b> <sup>(4)</sup>	<b>\$5,621</b>	<b>\$4,985</b>	<b>\$(636)</b>
<b>Tax effect</b>			\$(134)
<b>AOCI</b>			<b>\$(502)</b>

- 1) AOCI per share, a component of book value per share, is calculated by dividing (i) accumulated other comprehensive income (loss), by (ii) shares outstanding as of the end of each period shown. Changes in AOCI as of September 30, 2022 are primarily from net unrealized losses on investments as a result of an increase in market interest rates during the period. We do not expect to realize these losses given that we have the ability and the expectation to hold these securities until recovery.
- 2) Actual maturities may differ as a result of calls before scheduled maturity.
- 3) Includes residential mortgage-backed securities, commercial mortgage-backed securities, collateralized loan obligations, other asset-backed securities and mortgage insurance-linked notes, which are not due at a single maturity date. The average duration for these investments is three years.
- 4) Total amortized cost and total fair value include \$86 million and \$76 million, respectively, of securities loaned to third-party borrowers under securities lending agreements or sold under repurchase agreements.

1) Common stock and paid-in surplus can only be affected by direct capital contributions and returns of capital approved by the Pennsylvania Insurance Department.

2) Unassigned funds are enhanced by earnings (net of contingency reserve inflows and outflows) and is a regulatory constraint on the ability to pay an ordinary dividend, since unassigned funds must be positive in order to pay such a dividend. Based on the current strong performance and assuming the continuation of favorable credit performance in our mortgage insurance business, we expect that Radian Guaranty could potentially have positive unassigned surplus by early 2023. While all proposed dividends and distributions to stockholders must be filed with the Pennsylvania Insurance Department prior to payment, if a Pennsylvania domiciled insurer has positive unassigned funds, such insurer can pay dividends or other distributions out of such funds during any 12-month period in an aggregate amount less than or equal to the greater of: (i) 10% of the preceding year-end statutory policyholders' surplus or (ii) the preceding year's statutory net income, in each case without the prior approval of the Pennsylvania Insurance Department.

3) Contingency reserves are established by contributing 50% of earned premiums every year. Releases of contingency reserves occur with either an annual loss ratio greater than 35% or after 10 years on a first-in, first-out basis, and are released into unassigned funds.

- 1) Through September 30, 2022, Radian Guaranty has entered into six fully collateralized reinsurance arrangements with the Eagle Re Issuers. The Eagle Re Issuers are not subsidiaries or affiliates of Radian Guaranty. Based on the accounting guidance that addresses VIEs, we have not consolidated any of the Eagle Re Issuers in our consolidated financial statements.
- 2) Effective September 26, 2022, Radian Guaranty exercised its optional clean-up call right to terminate Radian Guaranty's excess-of-loss reinsurance agreements with Eagle Re 2020-2 Ltd. In connection with the termination of Radian Guaranty's excess-of-loss reinsurance agreement with Eagle Re 2020-2 Ltd. the insurance-linked notes issued by Eagle Re 2020-2 Ltd. were redeemed in full with a distribution of remaining collateral assets. As part of the redemption, Radian Guaranty expensed \$2.8 million of unamortized issuance expenses, that were not fully amortized prior to the clean-up call.
- 3) PMIERS MRA Reduction represents the reduction in the Minimum Required Assets as of Q3 2022, which is a risk-based minimum required asset amount, as defined in PMIERS.
- 4) Delinquency % represents the percentage of risk in force that is 60 or more days delinquent.
- 5) When delinquency trigger % is reached then the amortization of the issued notes stops and coverage remains constant.
- 6) Based on the current level of defaults reported to us, Eagle Re 2019-1 and Eagle Re 2018-1 insurance-linked notes are currently subject to a delinquency trigger event. Both the amortization of the outstanding reinsurance coverage amount pursuant to our reinsurance arrangements with the Eagle Re Issuers and the amortization of the principal amount of the related insurance-linked notes issued by the Eagle Re Issuers have been suspended and will continue to be suspended during the pendency of the trigger event.
- 7) Attachment % represents the amount of cumulative paid losses as a percentage of initial and current risk in force, respectively, that Radian retains prior to the reinsurance provided through the Insurance-Linked Notes structure absorbing losses.
- 8) Detachment % represents the amount of cumulative paid losses as a percentage of initial and current risk in force, respectively, that must be reached before Radian starts absorbing losses again.

# Consolidated Non-GAAP Financial Measures Reconciliations

# Use of Non-GAAP Financial Measures

In addition to the traditional GAAP financial measures, we have presented “adjusted pretax operating income (loss),” “adjusted diluted net operating income (loss) per share” and “adjusted net operating return on equity,” which are non-GAAP financial measures for the consolidated company, among our key performance indicators to evaluate our fundamental financial performance. These non-GAAP financial measures align with the way the Company’s business performance is evaluated by both management and the board of directors. These measures have been established in order to increase transparency for the purposes of evaluating our operating trends and enabling more meaningful comparisons with our peers. Although on a consolidated basis “adjusted pretax operating income (loss),” “adjusted diluted net operating income (loss) per share” and “adjusted net operating return on equity” are non-GAAP financial measures, we believe these measures aid in understanding the underlying performance of our operations. Our senior management, including our Chief Executive Officer (Radian’s chief operating decision maker), uses adjusted pretax operating income (loss) as our primary measure to evaluate the fundamental financial performance of the Company’s business segments and to allocate resources to the segments.

Adjusted pretax operating income (loss) is defined as GAAP consolidated pretax income (loss) excluding the effects of: (i) net gains (losses) on investments and other financial instruments, except for certain investments attributable to our reportable segments; (ii) gains (losses) on extinguishment of debt; (iii) amortization and impairment of goodwill and other acquired intangible assets; and (iv) impairment of other long-lived assets and other non-operating items, such as impairment of internal-use software, gains (losses) from the sale of lines of business and acquisition-related income and expenses. Adjusted diluted net operating income (loss) per share is calculated by dividing (i) adjusted pretax operating income (loss) attributable to common stockholders, net of taxes computed using the company’s statutory tax rate, by (ii) the sum of the weighted average number of common shares outstanding and all dilutive potential common shares outstanding. Adjusted net operating return on equity is calculated by dividing annualized adjusted pretax operating income (loss), net of taxes computed using the company’s statutory tax rate, by average stockholders’ equity, based on the average of the beginning and ending balances for each period presented.

Although adjusted pretax operating income (loss) excludes certain items that have occurred in the past and are expected to occur in the future, the excluded items represent those that are: (i) not viewed as part of the operating performance of our primary activities or (ii) not expected to result in an economic impact equal to the amount reflected in pretax income (loss). These adjustments, along with the reasons for their treatment, are described below.

- 1) *Net gains (losses) on investments and other financial instruments.* The recognition of realized investment gains or losses can vary significantly across periods as the activity is highly discretionary based on the timing of individual securities sales due to such factors as market opportunities, our tax and capital profile and overall market cycles. Unrealized gains and losses arise primarily from changes in the market value of our investments that are classified as trading or equity securities. These valuation adjustments may not necessarily result in realized economic gains or losses.  
  
Trends in the profitability of our fundamental operating activities can be more clearly identified without the fluctuations of these realized and unrealized gains or losses and changes in fair value of other financial instruments. Except for certain investments attributable to our reportable segments, we do not view them to be indicative of our fundamental operating activities.
- 2) *Loss on extinguishment of debt.* Gains or losses on early extinguishment of debt and losses incurred to purchase our debt prior to maturity are discretionary activities that are undertaken in order to take advantage of market opportunities to strengthen our financial and capital positions; therefore, we do not view these activities as part of our operating performance. Such transactions do not reflect expected future operations and do not provide meaningful insight regarding our current or past operating trends.
- 3) *Amortization and impairment of goodwill and other acquired intangible assets.* Amortization of acquired intangible assets represents the periodic expense required to amortize the cost of acquired intangible assets over their estimated useful lives. Acquired intangible assets are also periodically reviewed for potential impairment, and impairment adjustments are made whenever appropriate. We do not view these charges as part of the operating performance of our primary activities.
- 4) *Impairment of other long-lived assets and other non-operating items.* Includes activities that we do not view to be indicative of our fundamental operating activities, such as: (i) impairment of internal-use software and other long-lived assets; (ii) gains (losses) from the sale of lines of business; and (iii) acquisition-related income and expenses.

In addition to the above non-GAAP measures for the consolidated company, we also have presented as supplemental information non-GAAP measures for our homegenius segment of adjusted pretax operating income (loss) before allocated corporate operating expenses and adjusted gross profit. Adjusted pretax operating income (loss) before allocated corporate operating expenses is calculated as adjusted pretax operating income (loss) as described above (which is the segment’s ASC 280 GAAP measure of operating performance), adjusted to remove the impact of corporate allocations of other operating expenses for the homegenius segment. Adjusted gross profit is further adjusted to remove other operating expenses. In addition, homegenius adjusted pretax operating margin before allocated corporate operating expenses and adjusted gross profit margin are calculated by dividing homegenius adjusted pretax operating margin before allocated corporate operating expenses and adjusted gross profit, respectively, by GAAP total revenue for the homegenius segment. For the homegenius segment, adjusted pretax operating income (loss) before allocated corporate operating expenses, adjusted gross profit, and the related profit margins are used to facilitate comparisons with other services companies, since they are widely accepted measures of performance in the services industry and are used internally as supplemental measures to evaluate the performance of our homegenius segment.

See Slides 28 through 30 for the reconciliation of the most comparable GAAP measures, consolidated pretax income (loss), diluted net income (loss) per share and return on equity to our non-GAAP financial measures for the consolidated company, adjusted pretax operating income (loss), adjusted diluted net operating income (loss) per share and adjusted net operating return on equity, respectively. Slide 31 also contains the reconciliation of adjusted pretax operating income (loss) to adjusted pretax operating income (loss) before allocated corporate operating expenses and adjusted gross profit for the homegenius segment.

Total adjusted pretax operating income (loss), adjusted diluted net operating income (loss) per share, adjusted net operating return on equity, homegenius adjusted pretax operating income (loss) before allocated corporate operating expenses and homegenius adjusted gross profit should not be considered in isolation or viewed as substitutes for GAAP pretax income (loss), diluted net income (loss) per share, return on equity or net income (loss), or in the case of the homegenius non-GAAP measures, for homegenius adjusted pretax operating income (loss). Our definitions of adjusted pretax operating income (loss), adjusted diluted net operating income (loss) per share, adjusted net operating return on equity and homegenius adjusted pretax operating income (loss) before allocated corporate operating expenses, homegenius adjusted gross profit, homegenius adjusted pretax operating margin before allocated corporate operating expenses or homegenius adjusted gross profit margin may not be comparable to similarly-named measures reported by other companies.
